MDHA ClientTrack Implementation Phase 2 - Customizations

Content: Information and documents relating to the following categories in the Monitoring Tool were examined during the monitoring process:

- Introduction
- Section A – Planning: Sustainability, Strategic Planning and Growth
- Section B – Project Management
- Section C – Management and Operations: Governance
- Section D – Policies and Procedures
- Section E – Contributing HMIS Organization (CHO) Monitoring
- Section F – Training and Support
- Section G - Reporting

Scores for each section are as follows:

Section	Total Points Available	Workgroup Score (%)	MDHA Self Score (%)
Introduction	-	-	-
Section A - Planning	14	11 (79%)	8 (57%)
Section B – Project Management	28	28 (100%)	25 (89%)
Section C – Management and Operations	12	8 (67%)	10 (83%)
Section D – Policies and Procedures	12	8 (67%)	8 (67%)

Section G - Reporting	12	5 (42%)	6 (50%)
Total Points	104	82 (79%)	82 (79%)

Overall, the Workgroup scored the HMIS Lead Agency at 82 of 104 points (or 79%) for this first monitoring. This first score is intended to serve as a baseline to demonstrate improvements in future monitoring. MDHA's Self Score was the same overall, but differed in some sections. In some cases, MDHA scored itself lower than the Workgroup and, in other cases, higher than the Workgroup. As noted above, it is important to keep in mind that MDHA was scored on some items that may be considered best practices for the future, but are not current regulatory or Committee requirements.

System Performance Committee – August 2020

Committee Chairs: Ellen Magnis and Wayne Walker

MDHA Attendees: Phil Force (MDHA), Natalie Martinez (MDHA)

Members/Visitors: Josh Cogan, Amanda Dycus; Hannah Sims, Christina Mintner, Dustin Perkins, Blake Fetterman

Meeting Date: 8/20/20

D-One Plan & Implementation: Everything this committee is working on ties to the plan for creating and publishing a community dashboard.

Discussion:

Feedback from Citizen Homelessness Commission was discussed (with overall very positive response to the concept and first pass at the dashboard), and Phil is already starting to make these tweaks:

- All components of the math problem should only include those who are literally homeless (not those who are at risk or housed). So should include those in street outreach, shelter and shelter overflow (plus transitional housing with an explanation).
- Capture those receiving services who are at risk somewhere else in the dashboard.
- Capture those receiving services while housed somewhere else in the dashboard.
- Insert a chart showing a month by month tracker of the total number at end of math problem so that the ending number has context (are we going up or down). See the COVID-19 charts with the trend line for example.
- Show somewhere the breakdown of those households that are homeless by population type: Individuals; Families with children; Unaccompanied youth
- Include a link to a heat map showing the locations of encampments (Our Calling has this map).

- Draft FAQ content was added to cover some of the other questions they asked -- like why do people become homeless --noting this was an important opportunity to provide basic level education to the lay public.
- A CHC member connected us to a map expert who may be willing to look at the dashboard and give us some feedback on lay person readability.

Next feedback sessions will be with CoC Assembly and Clutch Consulting. A request has been made to present to Dallas Area Partnership, and Christina will help us with this if we do not hear back from Dr. Cerise.

All Committee members were asked to read the FAQs and suggest edits and watch for changes being made for Version 1.1 of the dashboard post CHC feedback. Some quick suggested edits for FAQ readability were provided for Phil.

We thanked Phil for his work on this project – we could not do this without his support.

Ellen then gave an update on the status of the CEO Learning Collaborative to look at income growth from start to exit for those in Rapid Rehousing (RRH), as households cannot be successful in RRH unless they can pick up the rent in full at the end of the program. This session was facilitated by Carl Falconer and drove good dialogue with CEOs about data quality and importance of this kind of data for our HUD scoring. Two highest performers were identified and presented their work, noting some internal data management practices and emphasis on income from the outset of case management. CEOs agreed to meet every quarter to check progress on this important metric. Phil will look at best ways to do interim and look back reporting (a year history) for each of these sessions.

The Committee discussed challenges around easy reporting on income growth and challenges with income going up and down during the period of rapid rehousing. Ultimately, we noted that we had to become proficient in pulling the same kind of data (same parameters) as HUD uses to score our CoC to help us maximize Federal dollars for our collective work.
